

Department of Homeland Security and Air Force Research Labs (AFRL) - \$5.9 million

decide[®] Energy

Norwich University Applied Research Institutes will develop decide[®] cyber security simulations for the energy sector to:

- **Strengthen strategic decision-making and communications that build a resilient energy sector prepared to respond to a cyber security incident.**
- **Inculcate effective cyber-incident response behaviors.**

Norwich University Applied Research Institutes provides training technologies and services that enhance organizational cyber incident response capabilities and critical infrastructure security. The decide[®] Energy platform will be developed with funding from the Department of Homeland Security and will be a trusted cybersecurity training solution for the energy sector. This platform will provide an unmatched experience in simulating an array of cyber threats and incident scenarios to participants located around the world.
